April 27, 2021

Dear Parents and Guardians,

Students in grades four and seven are required to complete the Foundation Skills Assessments (FSAs) in all Yukon schools. The FSAs are a set of B.C./Yukon curriculum-based assessments in reading, writing and numeracy. These were completed over several weeks in February and March 2021.

These assessments measure the important foundation skills that students have gained over several school years, not just in a single year, and serve as a snapshot of what the students have learned. This information is valuable for teachers, as it may set direction for future learning, and to Yukon Education, as it may indicate areas for professional development and resource allocation.

The reading and numeracy assessments consist of multiple-choice questions and written answers. The writing section has two writing tasks – one short answer and one long answer.

Your child will be given the results to take home this week. Please feel free to contact your child's teacher about further information or questions.

Sincerely,

Jeanette Gallant
