

INSPIRE GIRLS TO CHANGE THE WORLD.

Technovation Girls Canada invites participants from Yukon, Northwest Territories and Nunavut to join the 2021 program. Girls work in teams with mentors to develop a mobile app and a business, and develop a video pitch in this 5 month online program.

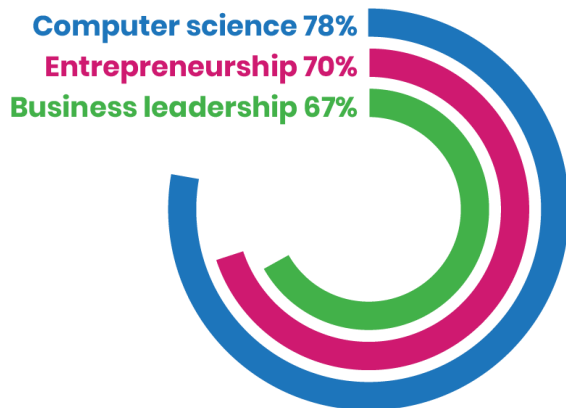

Participants: Female students between the ages of 10-18, join this program to gain tech and entrepreneurial skills.

Peer mentors: If you are a college/university student, join to peer advise the teams.

Together, you'll develop skills like collaboration, problem solving and leadership, and join a global community of girls and professionals creating technology for good.

Technovation changes girls' lives.

Girls who complete our program express a greater interest in technology and leadership, with 58% of our alumni enrolling in more computer science courses after Technovation.
